## DETAILED ACTION

### *Response to Arguments*

1. Applicant's arguments have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Kadziauskas et al. (6,394,974).

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-19 are rejected under 35 U.S.C. 102(e) as being anticipated by Kadziauskas et al. (6,394,974). Kadziauskas et al. disclose Phacoemulsification apparatus including a headpiece, a needle and an electrical system/power as claimed, the power supply for driving transducer and varying driving power to the transducer in response to loading of cutting tip by phase shifting voltage and current supplied to the transducer and the power (figs. 1-12 and col. 5-10).
